

To Members of the Town Board, Town of Yorktown, the Town Clerk and the Town Attorney

I am opposed to the installation of any Large Scale Ground or Pedestal Mounted Solar Arrays or Panels within Residentially Zoned or Districts in the Town of Yorktown.

I am opposed to any Grandfathering, special exceptions, special exclusions, supervisory grants or any other dispensation.

The owners and developers were well aware of the Solar Moratorium. They signed legally binding waivers and should have been well aware of the financial risks, if there were risks.

For a Board Member to opine that the owners, developers or applicants knew the risk but we should exempt or grandfather them is absurd and amounts to a gift of public view.

There is always the possibility as in other projects in Yorktown they were told by do what other developers in Yorktown do, whatever you want and someone on the Board will try to intervene!
